DATUM

12/15/2022

**Confirmation of the fulfilment of the requirements of DIN ISO 45001:2018 by the occupational health and safety management system “Occupational Health- and Risk-Managementsystem” OHRIS:2018**

Attachment

Comparison spreadsheet DIN ISO 45001:2018 with OHRIS:2018

Dear Mr. Eberius,

the operative occupational health and safety management system for your company was recertified on 10/13/2022 by the occupational health and safety authority of the Government of Swabia under the registration number 09-00294 on the basis of OHRIS:2018 “Occupational Health- and Risk-Managementsystem”. In response to your query from 12/13/2022 requesting information on whether your occupational health and safety management system also meets the requirements of DIN ISO 45001:2018 “Management Systems for Occupational Health and Safety”, we take the following position:

**We hereby confirm that the operative occupational health and safety management system based on OHRIS:2018 that is in place within your company also fulfils the requirements of DIN ISO 45001:2018.**

The OHRIS occupational health and safety management system concept therefore complies with the requirements of

- the ILO Guidelines on occupational safety and health management systems ILO-OSH 2001 and
- the national guidelines for occupational health and safety management systems.

The national guidelines for occupational health and safety management systems are considered to be a framework concept and point of reference for the federal state occupational health and safety authorities. The contents of the guidelines are mandatory for all specific occupational health and safety management system concepts by the national occupational health and safety authorities. The Regional Committee for Occupational Health and Safety and Safety Technology (LASI) has confirmed that OHRIS fulfils the requirements of the national guidelines for occupational health and safety management systems. As the national guidelines implement the requirements of the ILO "Occupational safety and health management systems" guidelines, OHRIS also fulfils the requirements of these guidelines. The fact that OHRIS fully complies with the requirements of the ILO guidelines permits the use of OHRIS in companies that operate both nationally and internationally.

The requirements of the system elements of OHRIS:2018 conform with the requirements set out in chapters 4 to 10 of the DIN ISO 45001:2018 standard for occupational health and safety management systems. An occupational health and safety management system that has been implemented based on OHRIS:2018 will therefore also fulfil the requirements of DIN ISO 45001. The spreadsheet attached shows a comparison of the system elements with the requirements of the standard.

Kind regards

Dipl.-Ing. Andreas Zapf  
Ministerialrat
